

## What is CompanyCam?

CompanyCam is a photo-based solution that makes it insanely easy for you and your crews to keep track of what's happening at every job. Ditch the messy text threads and complicated folders for an app that keeps every project, photo, video, and conversation in one place. With CompanyCam, contractors save time and money every single day.

## Real Results

CompanyCam doesn't just decrease miscommunication and mistakes, it covers your butt when the inevitable mistake does happen. Using CompanyCam saved EAS Environmental LLC \$35,000 when they accidentally demoed an apartment that wasn't on the demo list. Because they had good documentation of the pre-existing mold and roof damage, they were able to get the apartment covered in their insurance claim.
